Location: Buenos Aires / Madrid, remote

SUMMARY

Senior Product Designer with a BA in Graphic Design and 10+ years of experience bridging brand craft and product systems. Experienced in product discovery, user research, information architecture, wireframing, prototyping, UI design, interaction design, and design systems. First product designer hired at MaintainX, helping scale the design function as the company grew past 200 employees. Currently at Apaleo, holding design decision-making autonomy across two product teams: Payments and Fiscalization. Since 2022, has run a parallel freelance practice in brand and product design alongside full-time roles. Process increasingly incorporates AI-native and AI-assisted design workflows, including AI-assisted research synthesis, rapid prototyping, and tools such as Cursor and Claude Code.

SKILLS

Product Design, UX Design, UI Design, Product Discovery, User Research, Information Architecture, Wireframing, Prototyping, Usability Testing, Interaction Design (IxD), Design Systems, Stakeholder Management, Data-Informed Design, KPIs and OKRs, 0-to-1 Product Design, Accessibility, Agile / Scrum, Cross-functional Collaboration, B2B SaaS, AI-Assisted Design, AI-Native Workflows, Content Strategy, UX Copywriting

EXPERIENCE

Apaleo - Senior Product Designer

June 2023 - Present | Remote | B2B hospitality platform

Embedded across two product teams, Payments and Fiscalization, with full design decision-making autonomy. Partner directly with Product and Engineering from problem definition through implementation.

- Run customer research and interviews directly, translating complex regulatory and financial requirements (tax, deposits, invoicing) into clear, implementable product experiences.
- Use AI-native workflows throughout, including AI-assisted interview analysis, rapid prototyping, and vibe coding with Cursor, to explore and validate ideas beyond traditional design tools.

Freelance - Brand and Visual Designer / Product Consultant

May 2022 - Present | Remote (Spain) | Concurrent with full-time roles below

Parallel independent practice supporting early-stage teams on brand and product between full-time engagements. Brand work includes logos, visual identity, and websites. Product work includes discovery, user interviews, information architecture, wireframing, and final designs for implementation.

Pura Mente - Senior Product Designer

September 2022 - May 2023 | Remote | Meditation and community platform for the Spanish-speaking world

Led product design across the MVP and subsequent releases, including discovery, information architecture, wireframing, prototyping, and final UI. Worked closely with Product, Research, and Engineering to translate user needs into product experiences.

MaintainX - Senior Product Designer

May 2020 - April 2022 | San Francisco (Remote) | Workflow management platform for industrial and frontline teams

First product designer hired at MaintainX, joining a six-person team and working directly with the CEO and CTO. Owned the transition from Sketch to Figma, built the platform's early Design System, and helped make the case to grow the design team from one to two designers. The company scaled past 200 employees during this tenure.

- Designed web and mobile (iOS and Android) experiences for a mobile-first platform used by industrial and frontline workers, often outdoors in direct sunlight with gloved or wet hands, which shaped decisions around contrast, touch-target sizing, and glanceable information hierarchy.
- Led discovery, user interviews, information architecture, wireframing, and final UI across continuous MVP and product improvements.

PedidosYa (Delivery Hero) - Product Designer, Growth

November 2019 - June 2020 | Buenos Aires | One of only two major on-demand delivery platforms in Argentina, alongside Rappi

Product Designer on the Growth Tribe, focused on onboarding and sign-up.

- Owned a cross-functional project to redefine the app's core growth metric, partnering with Growth and Data to shift the team's focus from raw sign-ups to activated users (people converting into repeat purchasers), then redesigned the onboarding and sign-up funnel around that new definition and ran A/B tests to reduce drop-off in the request-food flow.
- Conducted qualitative research, including custom interviews, polls, and usability testing, with existing and prospective users to inform onboarding and profile and settings decisions.

Aerolab (Digital product agency, Buenos Aires) - October 2017 - November 2019

User Experience Designer | February 2018 - November 2019

UX/UI designer across web and mobile products for LATAM and US startups. Led the redesign of Ripio's wallet and dashboard, one of Argentina's largest crypto exchanges, a 4-month discovery-to-delivery engagement covering transactional flows, onboarding, credit flow, and UI kit foundations for its new design system.

Trainee UX/UI Designer | October 2017 - January 2018

Selected as one of four design fellows for Aerolab's UX/UI training program. Redesigned the donation flow for DonarOnline and co-built Caminos de la Villa, a web app helping residents track urbanization progress in underserved Buenos Aires neighborhoods, in partnership with nonprofit Wingu.

Conway + Partners - Visual and Brand Designer

March 2016 - September 2016 | Buenos Aires / New York | Real estate and hospitality branding agency

Remolino - Visual and Brand Designer

August 2015 - January 2016 | Buenos Aires / Zurich | Multidisciplinary design studio

Combo Brand Agency - Graphic Designer

June 2014 - July 2015 | Buenos Aires

EDUCATION

Bachelor of Arts, Graphic Design - University of Buenos Aires, 2010 - 2016

Interaction Design Trainee Program - Aerolab, 2017

TOOLS

Figma, FigJam, Cursor, Claude Code, Notion, GitHub, Slack, Illustrator, Photoshop, InDesign, Miro, Zeplin, Jira

LANGUAGES

Spanish - Native. English - Professional working proficiency.
